- **Placement Philosophy**

ITC takes a complete and comprehensive approach to the student placement process. Besides placing many students in local industries, a large number of **ITC** graduates leave to take job positions abroad, enter academia or start their own businesses. To maximize their flexibility, **ITC** provides them with a balanced and well-rounded education. This includes developing not only their technical skills but also their professional, communication and marketing skills as well.

With this in mind, **ITC** has implemented a novel program during which its students are given 3-months project placements with local companies. They work on real, live working projects within the companies, enabling them to build their technical skills and also learn how to work in a professional office environment. This program also provides an important benefit: as students successfully demonstrate their skills and capabilities they are often subsequently given job offers by that same company.

ITC operates a placement cell to actively assist students during the entire placement process. The cell works with students on all types of vacancies by constantly monitoring and communicating with local industrial organizations.

The placement cell's specific functions are as follows:

- ◆ Maintaining a database of correspondence from industrial organizations, such as placement opportunities
- ◆ Assisting students in resume preparation
- ◆ Holding interviewing training workshops
- ◆ Educating students about local industrial organizations

ITC is developing its Intelligent web based Resource Management and Workflow Management Systems, in which professional developers are required. Thus, placement to students of **ITC** is provided for development of these systems.

Moreover **ITC** is run by Anoopam Mission, which is a registered charitable organization having its devotees across the world. There are many other organizations run by Anoopam Mission which also requires IT professionals, which gives placement opportunity to **ITC** students.

Some of the devotees of Anoopam Mission are working at higher post in organizations like Intel, Microsoft, AT & T, Walmart.com etc. This enables good contacts with corporates and thus help increase possibility of **ITC** students placement.

Followers of Anoopam Mission, across the world, supports **ITC** students to get better jobs, be it in India, USA, UK or other parts of the world.

- **Placement Statistics**

As previously noted, **ITC** successfully places students in a variety of positions: with local industries, with international companies, as teachers and as entrepreneurs.

The following is the number of students given placement during the last three years:

Placement of Students

	1998-1999	1999-2000	2000-2001	2002-2003
'O' Level	18	16	16	06
'A' Level	-	-	-	13
